

SHAPING POLICIES

EMPOWERING CHARGE POINT OPERATORS

Through National & State Committees, CPOS India connects CPOs with policymakers to address challenges and drive impactful policy changes.

About

CHARGE POINT OPERATORS SOCIETY OF INDIA

Charge Point Operators Society of India is a group of people working to bring Ease of Doing Business to CPOs across the country. It brings together local and national bodies to effectively represent stakeholders' voices, facilitating ideation, deliberation, consensus on policy interventions and industry initiatives. CPOS of India is constituting National & State CPOs Groups and Committees that regularly take up its members' concerns/issues regarding various fields in coordination with the policymakers. Members can democratically nominate their representatives to committees or advisory forums, with nominations tabled before the Board for central or state-level roles.

INTENT

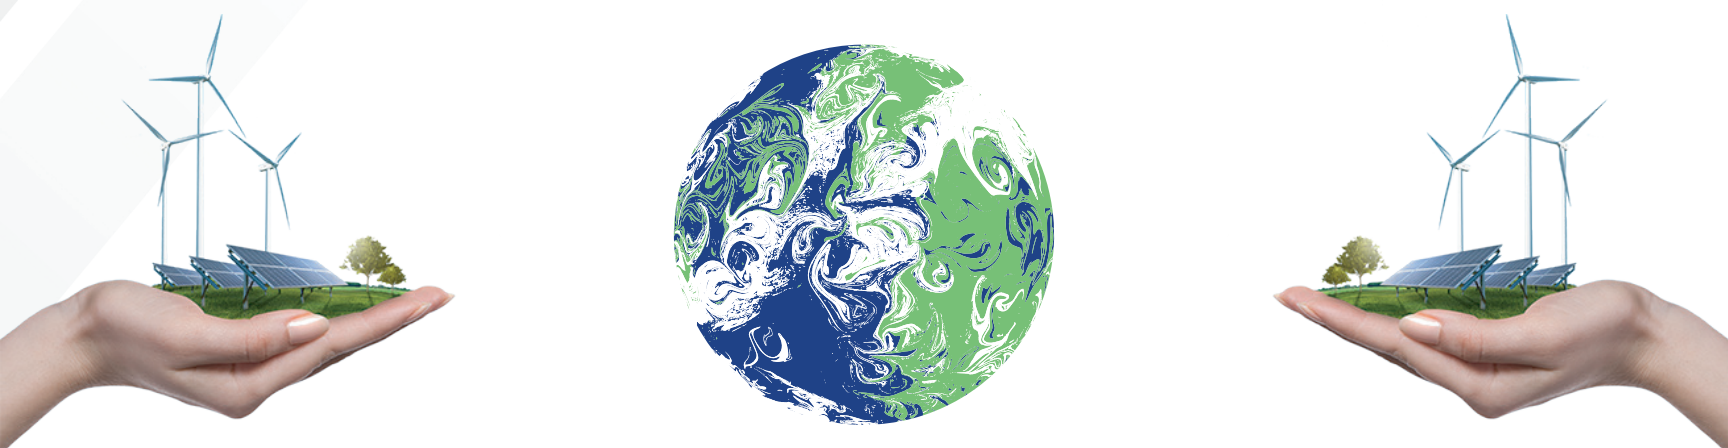

CPOS India is committed to supporting Charge Point Operators (CPOs), stakeholders, and the Government of India in shaping a future-ready EV ecosystem. It aims to position India as a leading nation in electric mobility by enabling the adoption of sustainable and integrated urban mobility solutions

CONTENT

CPOS India upholds **integrity, transparency, and ethical practices** while fostering collaboration among stakeholders. It focuses on driving innovation through sustainable solutions, ensuring safety and security of users and assets, and promoting best practices for the growth of a robust EV ecosystem.

EXTENT

CPOS India works closely with key ministries, including MSME, State Nodal Agencies, and NITI Aayog, on policy frameworks and pilot projects. Its efforts span across **charging infrastructure, electric mobility adoption, safety, environmental sustainability,** and implementation across various states and union territories.

22nd APRIL 2026

Le Méridien, New Delhi, India

CPOS to Launch National Taskforce for Charger Uptime

The launch aims to address critical challenges related to reliability, performance, and operational consistency within India's EV charging ecosystem, strengthening user confidence and infrastructure efficiency.

ANNOUNCEMENT 1

CPOS to Introduce Single Window Clearance for Electricity Permissions

ANNOUNCEMENT 2

The initiative aims to simplify approval processes, reduce timelines, and enable faster, more efficient expansion of the national charging network.

MEDIA

“Charging infrastructure succeeds when it is built on sound business fundamentals, not just installations. Recognising charging stations as revenue-generating businesses enables better policy design, smarter investments, and sustainable operator growth.”

ABHIJEET SINHA

**Emeritus President -
Charge Point Operators Society
of India (CPOS India)**
